

## PARTICIPATE IN AN EASY SOLUTION FOR HARD-TO-RECYCLE PLASTICS!

This program collects plastics that can't be recycled traditionally, right at your curb, and turns them into valued resources.

- An easy addition to your current recycling routine
- Keeps more plastics out of the landfill
- No need to sign up
- Available now in your neighborhood

Current participants in other communities have already collected **OVER 2000 TONS** of hard-to-recycle plastics!\*

## HOW DOES IT WORK?

1

Consumers purchase Hefty ReNew™ product

2

Hard-to-recycle plastics get collected in the bag

3

Full tied bags can be dropped off at any of the designated recycling centers in the area. Locations listed on [HeftyReNew.com](http://HeftyReNew.com)

4

Bags are sorted at the MRF and sent to a facility for use as valued resources

5

The collected plastics can become an energy resource, feedstock for fuels or new products, or ground into smaller pieces to make new plastic building products and plastic lumber

## WHAT GOES IN THE ORANGE BAG?

All items must be clean, dry and free of foil lining.
